What we will talk about

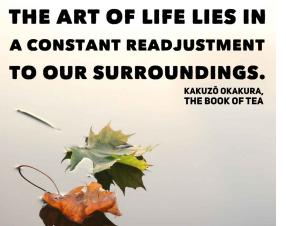

Definition of Transition

- Who?
- What?
- How?

'Process or a period of changing from one state or condition to another' *Merriam-Webster Dictionary*

THE SECRET OF CHANGE IS TO FOCUS ALL OF YOUR ENERGY NOT ON FIGHTING THE OLD, BUT ON BUILDING THE NEW! SOCRATES

Many speak of opportunities-"When one door closes, another one opens." But rarely about the hallway. The transition. The in between where you are and where you are headed.

The hallway doesn't have to be a scary, dark, endless confusion- it can be a space of massive transformation, great memories, and peace.

Children & change

- Childhood-constant changes
- Significant events with different impacts
- Anticipated/expected vs unpredicted/unexpected/unknown
- Help and support

Greatest allograft failure is during or immediately after transition.

<u>BMJ Open.</u> 2017; 7(6): e015593. Published online 2017 Jun 12. doi: <u>10.1136/bmjopen-2016-015593</u>

Martin Kreuzer ¹, Jens Drube ², Jenny Prüfe ², Franz Schaefer ³, Lars Pape ²; _ Members of the ERKNet Taskforce 'QoL & Transition'

'Adherence to guidelines significantly correlated with

Who?

What?

How?

Who?

- Children and young people
- Childhood crucial period in one's life
 - Growth, education, socialisation
- Characteristics:

digital natives 'hyperconnected' understanding of complex ideas

ESKD since infancy Multiple kidney transplants Multi-solid organ transplants All delivered in crucial time-period

Vulnerable cohort in crucial life time period with burden of chronic condition

- Unknown/unpredictable/unexpected.
- How would you feel?

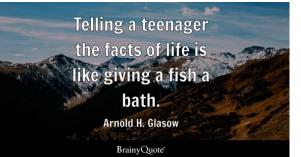

When you're too young for half the things you want to do and too old to do the other half.

everyteenagers.tumblr.com

What?

- Children are experts in adjusting to expected changes...
- Emotional
- Physical
- Intellectual
- Physiological

They need guidance for unknown Expect fear

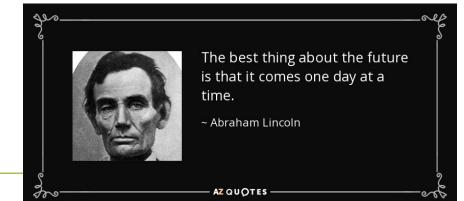

Team around the teenager

- Paediatricians children's advocates
- Multi-disciplinary approach is essential

Young person

- Nephrologist, surgeon, urologist, anaesthetist, cardiologist, specialist nurses, theatre staff, coordinators, ITU specialists
- Play specialist, family therapist, psychologist, youth worker, school teacher, transition nurse <u>+1</u>
- Family and friends
- Aim for good clinical outcomes and improved QoL

"Change is situational. Transition, on the other hand, is psychological. It is no those events, but rather the inner reorientation or self-redefinition that you have to go through in order to incorporate any of those changes into your life. Without transition, a change is just a rearrangement of the furniture. Unless transition happens, the change won't work, because it doesn't take." -William Bridges

> > Eur J Hum Genet. 2019 Dec;27(12):1783-1790. doi: 10.1038/s41431-019-0460-z. Epub 2019 Jul 30.

What do Governments see?

U.S. Government Spending, FY 2022

Top 10 Spending by Category and Agency

Children are essential investment for the future

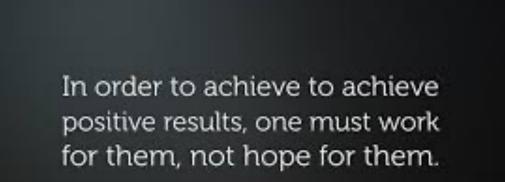

So far...

- Change is inevitable in life
- Children are experts in changing
- Fear of unknown is natural emotion
- Transition is a psychological process of self-redefinition
- Multi-disciplinary approach is essential
- Investment in transition programme is key

How?

Notity Kriefs

· service

Hope is not a strategy

esot.org

'One finger can not lift a pebble' Hopi proverb

Young person

• Family/friends/partners

• Play specialist, family therapist, psychologist, youth worker, school teacher, transition nurse <u>+1</u>

Adult transplant team

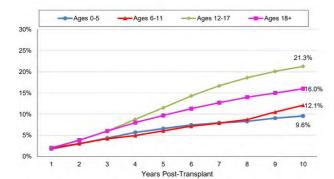

• nephrologist, clinical nurse specialist, transition nurse, surgeon, social worker, psychologist, Youth worker...

"Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it's the only thing that ever has." — Margaret Mead, American cultural anthropologist.

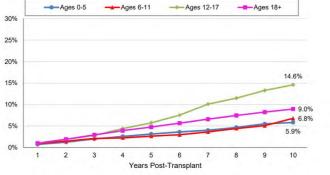

The John Hopkin Pediatric Solid Organ Transplant Transition Program

- Late childhood/early adolescence
- Close connection with adult transplant programmes
- Patient taking ownership
- Balance between patient needs/transplant programme resources

In each clinical visit:

- Transplant knowledge
- Medication knowledge
- Adherence to medication and lab work
- Understanding risk-taking behaviors
- How to stay healthy
- Self-advocacy
- Reproductive health
- Managing school and/or work
- Self-esteem
- Health insurance
- Advanced directives
- Identifying a support system

The Oxford Pediatric Solid Organ Transplant Transition Programme

- Lack of consistency in healthcare and support services
- Delivery of more patient-centred service
- Youth worker key
- Meetings not in hospital
 - Consider local coffee shops
- Integrated care
- Guideline but individualised programmes

Name:

Knowledge and skills	Yes	l would like some extra advice/help with this	
KNOWLEDGE			
I can describe my condition			
l know when to take my medications, names, doses, how often, etc			
I know who's who in the medical and nursing team			
l understand the differences between children's and adult health care			
I know about resources that offer support for young people with my condition			
SELF ADVOCACY (speaking up for yourself)			
I feel ready to start preparing to be seen alone for part of the clinic visit in the future			
I ask my own questions in clinic			
I have heard and know about 'Ask 3 Questions'			
HEALTH AND LIFESTYLE			
I understand it is important to exercise for my general health and condition			
I understand the risks of alcohol, drugs and smoking to my health			
I understand what appropriate eating means for my general health			
I am aware that my condition can affect how I develop e.g. puberty			
I know where and how I can access reliable information about sexual health			

The Ready Steady Go transition programme - Hello

The medical and nursing team aim to support and help you develop the confidence and skills to take charge of your own healthcare.

Filling in this questionnaire will help the team create a programme to suit you. Please answer all questions that are relevant to you and ask if you are unsure.

lame: Date:				Sidning
Knowledge and skills	Yes	I would like some extra advice/help with this	Comment	to adult services
KNOWLEDGE				services
I am confident in my knowledge about my condition and its management.				
l understand what is likely to happen with my condition in the future				
l understand what each of my medication/ treatment is for and their side effects				
l order and collect my repeat prescriptions and book my own appointments				
I know who to contact if I have any concerns about my health				
I call the hospital myself if there is a query about my condition or treatment				
I know about resources for young people or adults with my condition				
SELF ADVOCACY (speaking up for yourself)				
I feel confident to be seen on my own in clinic				
I understand my right to confidentiality				
l understand my role in shared decision making with the healthcare team e.g. Ask 3 Questions*				
HEALTH AND LIFESTYLE				
l exercise regularly/have an active lifestyle				
l understand the effect of smoking, drugs and alcohol on my condition and general health				
l understand what appropriate eating means for my general health				
I am aware that my condition can affect how I feel and function e.g fatigue, sexual function, fertility				
I know where and how I can access providers for accurate information about sexual health				
understand the implications of my condition and drugs on pregnancy/parenting

What do successful transplant programs have in common?

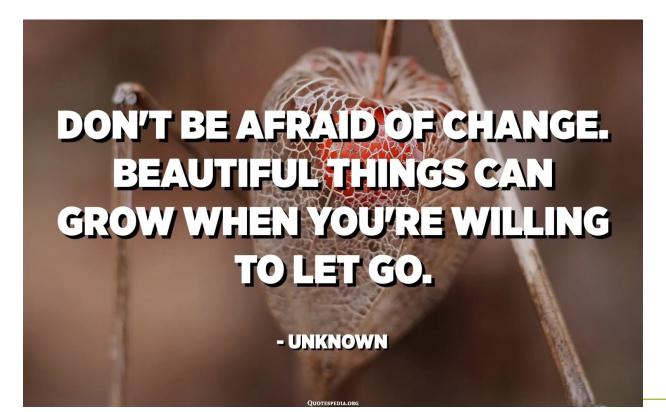

- Know that change is inevitable
- Fear is physiological emotion
- Transition is psychological process and is individual
- Focus on empowerment of young people
- Emphasis on community engagement and resources
 - Psychologist, social worker, family therapist
- Development of new friendships
 - Peer groups, Youth workers
- Help and support for the family

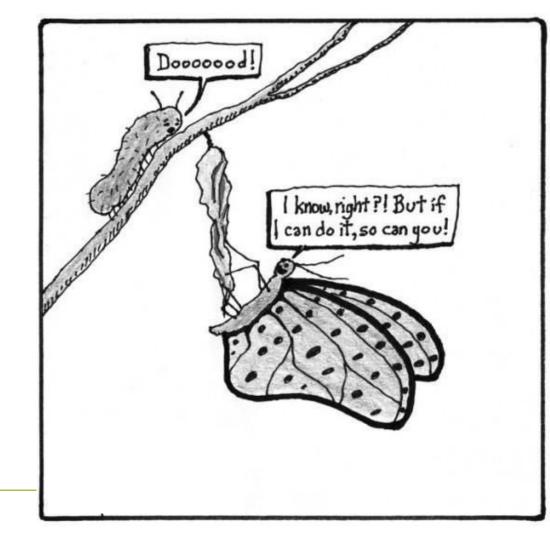

'Behind every beautiful thing there is some pain' Bob Dylan

Change is never painful, resistance to change is. Uncertainty is painful for brain that wants to keep us safe and alive.

Generation Alpha is coming: are you ready?

Nothing about me,

without me
